

“FORTA PREFAB” Ltd. QUALITY, ENVIRONMENT, ENERGY MANAGEMENT, OCCUPATIONAL HEALTH AND SAFETY POLICY

The core business of “Forta Prefab” Ltd. is production and construction of modular buildings. To ensure that our products are compliant with the highest requirements for quality, environment, energy efficiency and occupational health and safety we at Forta PRO have implemented, maintain, and continuously improve our Integrated Management System in accordance with the requirements of international standards ISO 9001, ISO 14001, ISO 45001, ISO 50001 and EN 1090 - 1. The system includes compliance with SINTEF and RISE product technical approvals, the needs and expectations of stakeholders, as well as legal requirements.

The Integrated Management System includes compliance with quality, environmental, energy management, occupational health and safety requirements throughout the product implementation cycle, from the design and production processes to the delivery of the ready-made product.

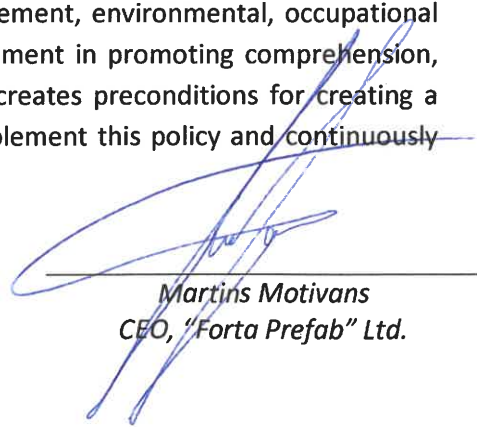

The company arranges its operations in a way that all employees contribute to the improvement of the environment, energy performance and work safety by preventing environmental pollution, reducing the risks of work environment, and securing economic use of natural and energy resources.

The following aspects ensure successful implementation of this policy:

- Continuous product quality improvement and quality control to ensure compliance with all customer requirements.
- Ability to offer customized solutions to meet new customers’ expectations and needs.
- Continuous improvement of the Integrated Management System in order to achieve performance improvements in energy efficiency, environmental management, occupational health and safety.
- Regular assessment of the company’s environmental impact to reduce environmental pollution caused by its operations.
- Supplier selection and procurement process based on their energy management, environmental, occupational health and safety performance.
- Ongoing monitoring of the implementation of measures and objectives set out in the energy management, environment, occupational health and safety programs.
- Employee involvement, training, and access to information to ensure that everyone is aware of their impact on the implementation of this policy.
- Regular assessment of occupational health and safety risks arising from company’s operations, and implementation of preventive actions to eliminate accidents and work-related illnesses.
- Consultation of employees on all matters concerning their occupational health and safety.
- Provision and maintenance of safe and appropriate equipment.
- Organization of safe and healthy working environment.

In order to ensure implementation of the quality, energy management, environmental, occupational health and safety policy, top management is maintaining active involvement in promoting comprehension, development and realization of this policy at all company levels. This creates preconditions for creating a corporate culture, where each employee embraces responsibility to implement this policy and continuously improve the Integrated Management System.
